- *These are the latest generation Boeing 737 MAX aircraft.*

**Mexico City, July 20, 2021.-** Aeromexico is working to continue adding new aircraft to its fleet and plans to add 12 new Boeing 737 MAX aircraft. The arrival is expected to begin next October.

These aircraft are in addition to the 28 that the company announced last April, making a total of 40 new aircraft to increase its fleet, replace other aircraft and improve connectivity.

"Aeromexico continues its strategy of having the safest, state-of-the-art, efficient, and least polluting fleet. The additional new aircraft will allow us to continue boosting connectivity in our main hubs to meet our customers' demand with the best aircraft, service, and a fare family that meets their travel needs," said Nicolas Ferri, Aeromexico's Chief Commercial Officer.

The agreement to add these 12 aircraft is being negotiated with Dubai Aerospace Enterprise (DAE) and is subject to the approval of the United States Court for the Southern District of New York, in charge of Aeromexico's Chapter 11 voluntary financial restructuring process.

Aeromexico's current fleet is comprised of 118 aircraft: 47 Embraer 190s, 53 Boeing 737s, and 18 Boeing 787 Dreamliner.
