

AEROMEXICO WELCOMES FIRST BOEING 737 MAX 9 AIRCRAFT

- *By the end of June, the airline will have a fleet of 108 aircraft and operate more than 12,700 flights.*
- *This aircraft model consumes up to 16% less fuel and produces 16% less CO2.*

Mexico City, June 1, 2021 - As part of their fleet plan, Aeromexico welcomed new Boeing 737 MAX 9 aircraft. The first aircraft landed in Mexico City in the early hours of May 29, and the second will arrive in the following hours.

In the last decade, Aeromexico undertook a landmark transformation, a successful strategy in the company's commitment to maintaining one of the safest, most modern, efficient, and less polluting fleets in the industry.

Thanks to innovations in their winglets, engines, and other components, the new MAX 9 aircraft will consume up to 16% less fuel, produce 16% less CO2 per passenger versus other aircraft of similar category and have a range of more than 6,000 km.

The aircraft has a unique configuration for Aeromexico with 181 seats, 16 in Premier Class, 18 in AM Plus, and 147 in Economy Class. It is expected these models begin commercial operations in mid-June.

With the arrival of these aircraft, Aeromexico plans to conclude this month with a fleet of 108 aircraft, comprised of:

787-8	787-9	737-800	737 MAX 8	737 MAX 9	Embraer 190
8	10	33	7	3	47

Last April, Aeromexico reached agreements to increase its fleet with twenty-four new Boeing 737-8 and 737-9 MAX models, as well as four 787-9 Dreamliners, which will be arriving between 2021 and 2022.
